PROFESSIONAL SUMMARY

Computer Science undergraduate and Full-Stack Developer experienced in building web applications using React.js, Node.js, Express.js, and MongoDB. Built AI-powered applications incorporating RAG, multi-agent workflows, secure authentication, payment integration, and REST APIs. Focused on developing scalable and reliable software solutions.

TECHNICAL SKILLS

Languages: JavaScript, Java, HTML, CSS

Frontend: React.js, Redux Toolkit, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL, Redis

AI/GenAI: LangChain, RAG, Qdrant, OpenRouter

CS Fundamentals: DSA, OOP, DBMS, OS, Computer Networks

Tools: Git, GitHub, Docker, Postman, Firebase, Razorpay

EXPERIENCE

Eisystems Services / Eisystems Technologies

Generative AI Intern | June 2026 – July 2026

- Completed a 6-week internship focused on Generative AI, covering LLMs, prompt engineering, LangChain, and RAG.
- Developed INTELLIVORA – AI Interview Simulator, a full-stack AI application for resume analysis, AI-generated interviews, response evaluation, and performance reporting.
- Implemented AI application workflows using React.js, Node.js, Express.js, MongoDB, Firebase, OpenRouter, and Razorpay.

PROJECTS

OMNIX – Multi-Agent AI Platform | [GitHub](#)

Tech Stack: React.js | Node.js | Express.js | LangChain | MongoDB | Redis | Qdrant | Docker

- Architected a modular multi-agent AI platform using LangChain StateGraph, dynamically routing requests across 8 specialized agents for chat, coding, web search, document processing, and vision tasks.
- Built AI workflows for PDF/PPT processing, web search, code generation, and vision analysis, integrating Groq, Gemini, OpenRouter, Tavily, and Qdrant.
- Implemented PDF RAG with document chunking and similarity search, along with Firebase authentication, Redis-based sessions, credit management, and Docker-based microservices.

INTELLIVORA – AI Interview & Aptitude Preparation Platform | [GitHub](#)

Tech Stack: React.js | Node.js | Express.js | MongoDB | Firebase | OpenRouter | Razorpay

- Developed a full-stack AI preparation platform supporting resume-based interviews, role-specific question generation, AI response evaluation, structured scoring, and performance reports.
- Built resume analysis and ATS-oriented evaluation, along with configurable aptitude tests, automatic scoring, progress tracking, and attempt history.
- Implemented Firebase/JWT authentication, HTTP-only cookies, protected APIs, and Razorpay-based credit management with server-side payment verification.

ZYVEN – AI React Component Generator | [GitHub](#)

Tech Stack: React.js | Node.js | Express.js | MongoDB | Firebase | OpenRouter | Razorpay

- Built an AI-powered platform that generates reusable React/JSX components from natural-language prompts.
- Implemented live React component preview with code sanitization and invalid-code protection.
- Developed authentication, personal component library, AI credit management, and Razorpay payment verification.

EDUCATION

School of Management Sciences, Lucknow

B.Tech — Computer Science & Engineering | 2023–2027

CERTIFICATIONS

- Microsoft — Fundamentals of Generative AI
- Microsoft — Fundamentals of Machine Learning
- Google Cloud — Cybersecurity Certificate Learning Path
